

Summary: Asia's AI hardware, held through an autocall that pays while markets swing

From the family's mandate to the note: what we recommend, why now, and what the family can expect

1 The client	2 The thesis	3 The product	4 The outcome
USD 100mn, 5 years, moderate risk Chak family office (NKE Private Wealth); ~5% of family wealth.	Asia controls AI's hardware ~70% of foundry (Taiwan), 83% of HBM (Korea), ~55% of chip test (Japan).	12.75% a year, 5Y autocallable note Natixis-issued, USD 100mn, five Asian ETFs: 3119 HK 35%, EWY 20%, EWT 15%, 2644 JP 15%, 00878 TT 15%.	Capital usually back early 78% called in year 1 (112.75%); 99.3% called within five years.
Two goals Compound capital for the next generation, and own Asia's digital transformation.	But the path is violent KOSPI -25% in ten weeks; VKOSPI at a record 91.2.	Step-down call, yearly Called if the basket $\geq 102.5\%$ in Y1, falling 2.5% a year to 92.5% in Y5; pays $100\% + 12.75\% \times \text{years}$.	Loss is rare 0.2% of paths end below 70%, where the family takes the basket's fall.
One constraint A defined capital barrier, not an open-ended equity drawdown.	And rates stay high FOMC median 4.125% to end-2027; long bonds lose ~4% per 1% rise.	70% barrier at maturity only If never called, 100% back unless the basket ends below 70%.	Priced with room Fair coupon 14.09%: Natixis keeps 1.34% a year for hedging and margin.

Why it fits the family

12.75%	Growth: a double-digit coupon from the AI-hardware theme, without having to time entry	70%	Protection: a defined barrier, checked only at maturity, for the legacy sleeve	~1.3 yrs	Flexibility: expected life is short, so capital returns early to reinvest at higher rates
---------------	---	------------	---	-----------------	--

Own the scarce part of AI, Asia's chips, memory and tools, and get paid while the market swings.

Call and loss probabilities on the team outlook (slide 9); fair coupon from the Monte Carlo pricing (Appendix E). Not a guarantee of future returns; capital at risk below the 70% barrier and to Natixis credit.
